Subject: RE: Lowerline

I'm thinking we may need to add some lo-vol sampling on the perimeters. We should be able to read it with the 30-30s or 29-29s. See what Sam says.

Do you need anything from us? We can put together our workplan that will outline the perimeter air sampling and day to day H&S requirements. Was going to have ARS provide if they were going to sub, he said they already had one drafted.

**** External Email ****
Ok.

Did you get the message that the call is now 9:45?

FYI, Greg Lord with ARS just called and said they didn't have people for the proposed schedule, so we'll provide personnel.
